TAIT RADIO COMMUNICATIONS

COMMIT WITH CONFIDENCE

Tait is a leading provider of radio communications solutions and will design a radio network that meets your needs. From simple to complex, from analog to digital, from conventional to trunked; the range of TaitNet radio network technologies represents Tait's commitment to deliver reliable, customized and high-performance solutions to organizations on the move.

It's reassuring to know that, across 150 countries, thousands of organizations have been choosing Tait as a partner with a proven track record of delivering on its radio network promises.

Vast experience

Having designed, installed and maintained thousands of radio networks across 40 years, we put our wealth of experience at your disposal.

Tailored to fit

Every network is different because every customer's need is different. A TaitNet solution is configured to exact requirements.

Guaranteed coverage: guaranteed availability

Be in command of your own destiny by possessing guaranteed communications capability where and when it's needed.

Performance you can count on

Because we design, manufacture and install the system, Tait offers an unwavering commitment to its performance.

Innovation: now and in future

Whether consulting over initial requirements or developing practical refinements beyond installation, Tait is always adapting and adding value.

Protect your investment

A TaitNet system can grow to meet future needs because of its modular and open protocol based technology.

Integrate with current/future equipment

Open interfaces ensure existing and planned equipment works together and give the power and flexibility to choose third party equipment if necessary.

Excellent project management

When implementing an upgrade, migration or an entirely new radio network, effective project management is the key. As a global company, we have successfully completed single-site installations and nationwide networks on time and on budget.

Ongoing support

Support comes in the form of a 24-hour Helpdesk, extensive training from dedicated systems specialists and remote/real time network monitoring to pre-empt issues and manage maintenance tasks efficiently.

A TaitNet radio network solution is ideal for a:

TRANSPORT PROVIDER

Needing to enhance customer service through more accurate real time passenger information.

UTILITY

With employees working alone in potentially hazardous environments who need to stay in touch.

PUBLIC SAFETY AGENCY

Needing a digital solution that can work with existing equipment, deliver truly open encryption and offer a clear future upgrade path.

MINING OR CONSTRUCTION COMPANY

With employees working in challenging terrain to communicate effectively and efficiently.

GOVERNMENT BODY

Needing to upgrade a public-access radio network so that several organizations can collaborate in mission-critical situations.

TAIT RADIO COMMUNICATIONS

NETWORKS ARE OUR BUSINESS

Whatever the need, we will work with you to identify initial requirements and tailor the solution to meet that need.

Migrating readily between technologies when the time is right, Tait can help complete any upgrade with minimized disruption and maximized equipment re-use.

TaitNet MPT 1327 Trunked System

MPT 1327 is one of the world's most widely used radio network technologies and Tait is one of the leading suppliers. The benefits of control, efficiency and cost-effectiveness are proven. Tried and tested technology eases migration, low operating and maintenance costs reduce cost of ownership, whilst ease of integration with third party equipment improves flexibility.

Continuing innovation from Tait, for example fast AVL fleet polling rates, ensures your choice is well supported in the long term.

TaitNet Conventional

When all-informed, open-channel communications are essential to an organization, TaitNet conventional radio systems are the ideal choice.

Multicast systems provide a wide range of configurations to suit customer needs.

TaitNet QS^2 Simulcast

When mobile teams spread over a wide area need access to the same information, TaitNet QS^2 Simulcast is a dependable and cost-effective solution. Ideal for utility or public safety organizations, saturation coverage ensures all staff are instantly available on the same channel.

TaitNet P25

TaitNet's APCO P25 solution is convenient to install and update. Digital audio clarity and sophisticated open standards based encryption are available today and, as digital technology, it has also been engineered to work with existing analog equipment.

TaitNet Paging

TaitNet's paging solution is designed to cope with the most demanding environments and deliver fast, reliable messaging at 512, 1200, or 2400 baud POCSAG.

TaitNet paging is scalable for use on a single site or multiple remote base stations and is simulcast compatible.

MORE INFORMATION For news, product specifications, comprehensive product information, case studies and contact details of your nearest Tait customer service facility, please visit **www.taitworld.com**

Specifications are subject to change without notice and shall not form part of any contract. They are issued for guidance purposes only. Tait is an ISO9001: 2000 and ISO14001: 2004 certified supplier.

HIGH PERFORMANCE EQUIPMENT FOR A HIGH PERFORMANCE NETWORK

While TaitNet solutions can work with third party terminals or base stations/repeaters, the building blocks of a TaitNet turnkey solution are Tait's own reliable mobiles, portables and base stations.

This equipment is software-configured and readily updated, reducing maintenance and upgrade costs. Remote monitoring and diagnostics ensure that when it comes to the status of all your radios, you are fully in the picture. Because Tait can offer the whole package, you only have one point of contact for support issues.
